

SURAJ KUMAR

Software Developer

Bengaluru, Karnataka, India

✉ surajsolanki8847@gmail.com | 📞 +91-7488653799 | 🔗 LinkedIn | 🐙 GitHub

SUMMARY

Full-stack Developer skilled in Java, Python, SQL, React.js, Node.js, and REST API development with hands-on experience building scalable AI-integrated applications and automation workflows. Strong foundation in backend engineering, system integration, problem-solving, and data structures & algorithms. Passionate about building reliable software solutions that improve operational efficiency and user experience.

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL, JavaScript

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, API Integration

Frontend: React.js, HTML, CSS

Databases: PostgreSQL, MongoDB, MySQL

AI & Cloud: OpenRouter AI, Google Cloud, TensorFlow, Keras

Tools & Technologies: Git, GitHub, CI/CD Pipelines, Postman

Concepts: Data Structures & Algorithms, Object-Oriented Programming, SDLC, Agile Development

PROJECTS

- Resume Analyzer Platform** | React.js, Node.js, PostgreSQL, REST APIs, OpenRouter AI Jan 2026
- Built a full-stack AI-powered resume analyzer that extracts skills, calculates ATS match scores and generates improvement suggestions using OpenRouter API and GPT-4o-mini.
 - Developed secure RESTful APIs with JWT authentication, bcrypt password hashing and Multer-based PDF/DOCX parsing using Node.js, Express.js and PostgreSQL.
 - Implemented responsive React.js dashboard with real-time match score visualization, matched and missing skill tags and AI-generated career improvement suggestions.
- AI Course Builder** | Node.js, React.js, REST APIs, Google AI, YouTube Cloud API Jul 2025
- Designed and implemented a full-stack AI platform to automate course creation using scalable backend architecture.
 - Developed secure RESTful APIs integrating Google AI and YouTube Cloud APIs for intelligent content generation.
 - Optimized system performance, reliability, and API efficiency using modular backend design.
- DeepFake Image Detection System** | Python, TensorFlow, Keras, CNN, Image Processing Apr 2025
- Developed a high-accuracy image classification system using Convolutional Neural Networks for binary detection.
 - Performed large-scale dataset preprocessing on 80,000+ images to improve model robustness and generalization.
 - Trained and optimized ML models, improving detection accuracy through iterative evaluation and tuning.

RESEARCH PUBLICATION

- Social Engineering: Risk and Counter Measures** | IJARCCCE Nov 2024
- Analyzed attack vectors including phishing, vishing, and impersonation through structured risk assessment frameworks.
 - Proposed mitigation strategies including MFA, access control, and security awareness measures.

EDUCATION

- RNS Institute of Technology** Bengaluru, India
- Bachelor of Engineering in Computer Science and Engineering (Cyber Security)* 2022 – 2026
- CGPA: 8.38 / 10

CERTIFICATIONS

- Data Analytics Essentials** – Key Skills: Big Data Analytics
- Google Cloud Career Launchpad (Cybersecurity Track)** – Key Skills: Cloud Security, SIEM Tools, AI in Cybersecurity, Threat Detection
